Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p-value signals whether the trends are statistically significant.

Results: pcontig_000

Overlap summary (Jaccard and projection tests)

Jaccard p-value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01

**Absolute distance from query to reference, pvalue= 0.4**

Results: pcontig_001

Overlap summary (Jaccard and projection tests)

Jaccard p-value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01

**Absolute distance from query to reference, pvalue= 0.04**

Results: pcontig_002

Overlap summary (Jaccard and projection tests)

Jaccard p-value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01

Absolute distance from query to reference, pvalue= <0.01

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p–value signals whether the trends are statistically significant.
Results: pcontig_003

Overlap summary (Jaccard and projection tests)

Jaccard p–value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01   **Absolute distance from query to reference, pvalue= <0.01**

Results: pcontig_004

Overlap summary (Jaccard and projection tests)

Jaccard p–value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection
Relative distance from query to reference, pvalue= <0.01   **Absolute distance from query to reference, pvalue= <0.01**

Results: pcontig_005

Overlap summary (Jaccard and projection tests)

Jaccard p–value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01   **Absolute distance from query to reference, pvalue= <0.01**

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p−value signals whether the trends are statistically significant.
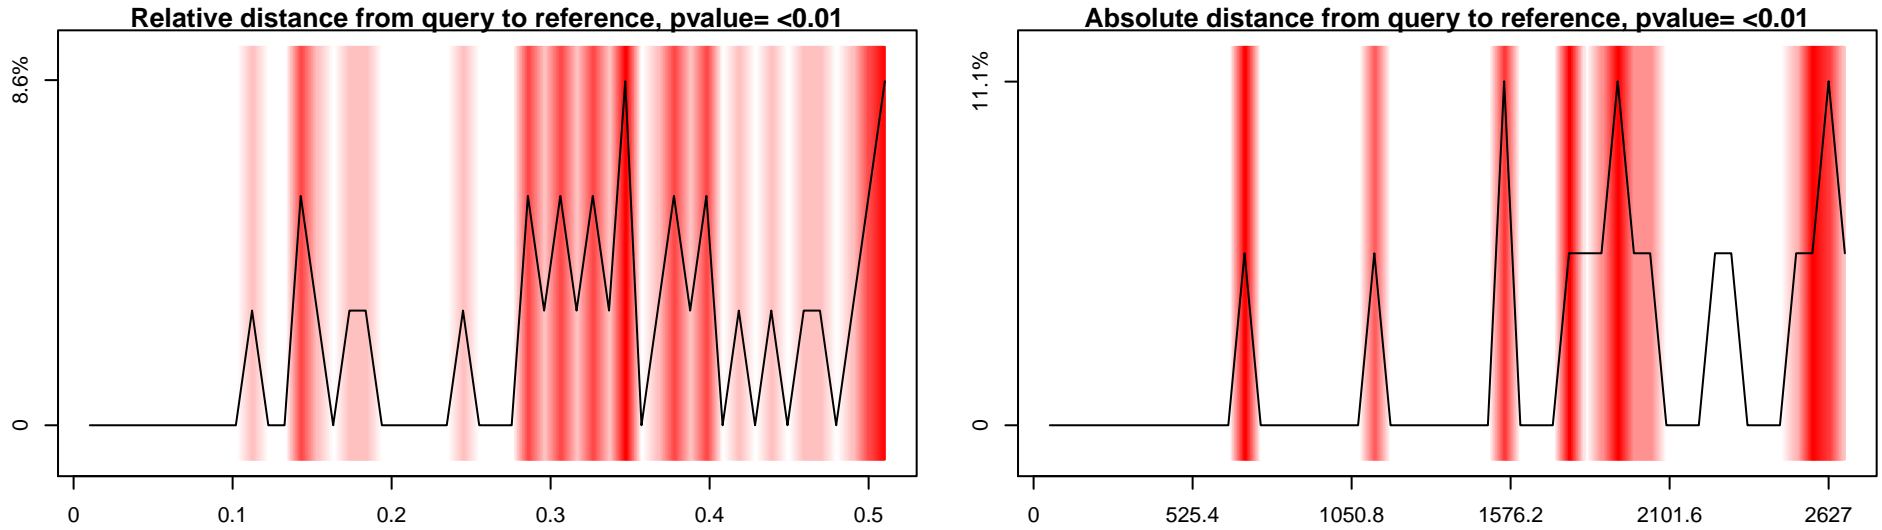

Results: pcontig_006

Overlap summary (Jaccard and projection tests)

Jaccard p−value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01

Absolute distance from query to reference, pvalue= <0.01

Results: pcontig_007

Overlap summary (Jaccard and projection tests)

Jaccard p−value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p–value signals whether the trends are statistically significant.

Results: pcontig_100

Overlap summary (Jaccard and projection tests)

Jaccard p–value: 0.12

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_103

Overlap summary (Jaccard and projection tests)

Jaccard p–value: 0.11

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_104

Overlap summary (Jaccard and projection tests)

Jaccard p–value: 0.05

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p-value signals whether the trends are statistically significant.

Results: pcontig_106

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.03

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_112

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.02

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_115

Overlap summary (Jaccard and projection tests)

Jaccard p-value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p-value signals whether the trends are statistically significant.

Results: pcontig_120

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_129

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.03

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_130

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.03

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p-value signals whether the trends are statistically significant.
Results: pcontig_138

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_147

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Insufficient data

Results: pcontig_148

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.05

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Color key
<- blue is negative correlation, -> red is positive correlation

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p-value signals whether the trends are statistically significant.

Results: pcontig_149

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.05

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_150

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_157

Overlap summary (Jaccard and projection tests)

Jaccard p-value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p−value signals whether the trends are statistically significant.

Results: pcontig_165

Overlap summary (Jaccard and projection tests)

Jaccard p−value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= 0.51

Absolute distance from query to reference, pvalue= <0.01

Results: pcontig_170

Overlap summary (Jaccard and projection tests)

Jaccard p−value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= 0.53

Absolute distance from query to reference, pvalue= 0.01

Results: pcontig_173

Overlap summary (Jaccard and projection tests)

Jaccard p−value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= 0.96

Absolute distance from query to reference, pvalue= <0.01

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p–value signals whether the trends are statistically significant.

Results: pcontig_174

Overlap summary (Jaccard and projection tests)

Jaccard p–value: 0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01 **Absolute distance from query to reference, pvalue= <0.01**

Results: pcontig_181

Overlap summary (Jaccard and projection tests)

Jaccard p–value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= 0.41 **Absolute distance from query to reference, pvalue= 0.01**

Results: pcontig_186

Overlap summary (Jaccard and projection tests)

Jaccard p–value: 0.03

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= 0.14 **Absolute distance from query to reference, pvalue= <0.01**

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p–value signals whether the trends are statistically significant.
Results: pcontig_188

Overlap summary (Jaccard and projection tests)

Jaccard p–value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_189

Overlap summary (Jaccard and projection tests)

Jaccard p–value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Results: pcontig_203

Overlap summary (Jaccard and projection tests)

Jaccard p–value: 0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p-value signals whether the trends are statistically significant.

Results: pcontig_207

Overlap summary (Jaccard and projection tests)

Jaccard p-value: 0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= 0.01

Insufficient data

Results: pcontig_233

Overlap summary (Jaccard and projection tests)

Jaccard p-value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01

Absolute distance from query to reference, pvalue= <0.01
Results: pcontig_235

Overlap summary (Jaccard and projection tests)

Jaccard p-value: <0.01

Query and reference intervals overlap significantly more than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly more than expected by chance, by projection

Relative distance from query to reference, pvalue= 0.01

Absolute distance from query to reference, pvalue= <0.01

Overlay line on graph is data density, over 50 bins
This range of densities is real though does not on its own convey significance
The p–value signals whether the trends are statistically significant.

Results: All chromosomes

Overlap summary (Jaccard and projection tests)

Jaccard p–value: <0.01

Query and reference intervals overlap significantly less than expected by chance, by Jaccard

Query midpoints and reference intervals overlap significantly less than expected by chance, by projection

Relative distance from query to reference, pvalue= <0.01

Absolute distance from query to reference, pvalue= <0.01
